

Objects

For many years, cathodic protection against corrosion has been successfully applied to a wide range of objects whose bare or coated surfaces are in underground, underwater or concrete-enclosed environments (locations). Illustration of such applications are shown below.

PIPELINES

- onshore pipelines
- offshore pipelines

PLANT AREAS

- industrial plants
- power plants
- underground metal installations
- petrochemical plants
- tank bottoms

OFFSHORE STRUCTURES

- platforms
- harbours
- jetties
- sluices
- oil rigs
- ports
- water intakes
- ships

PRODUCTION WELL CASINGS

- oil wells
- gas wells
- water wells

INTERNAL PROTECTION

- water tanks
- coolers
- turbines
- oil tanks
- condensers
- pipelines

STEEL REBARS IN CONCRETE

- marine structures
- dams
- offshore tunnels
- road bridges
- car parks
- cooling water towers

PRESTRESSED STEEL WIRES IN CONCRETE PIPES
